

Boost Summer Learning

Looking to provide an evidence-based academic boost for children in your community this summer? We partnered with YUSA to create Power Scholars Academy, a Y-specific program model with proven results. For more than a decade, YMCA's from coast-to-coast have been strengthening math and ELA skills and fostering a growth mindset for youth, while also supporting staff with professional development and improving family engagement.

The PSA model leverages *Arly*, a youth program management software offering essential digital tools and resources, including staff professional development, a family engagement app and more, all in one seamless solution.

Collectively, YMCA associations offering academic programs in partnership with Arly saw meaningful outcomes in their 2024 summer programs, including:

18.5k grade pk-8 scholars enrolled

2 months gained in 5 week ELA programs

95% of families felt valued as a partner in their child's experience

47 YMCA partner associations

2.5 months gained in 5 week math programs

90% of families would recommend program

92% of families were highly satisfied

88% of staff said work was rewarding

92% of staff said youth were highly engaged

"I think [this program] is the perfect balance for students of learning social and mindfulness skills, progressing their academic skills, and having fun! I really enjoyed connecting with this year's group of students."
-2024 summer staff member
